

Medical Malpractice in South Africa

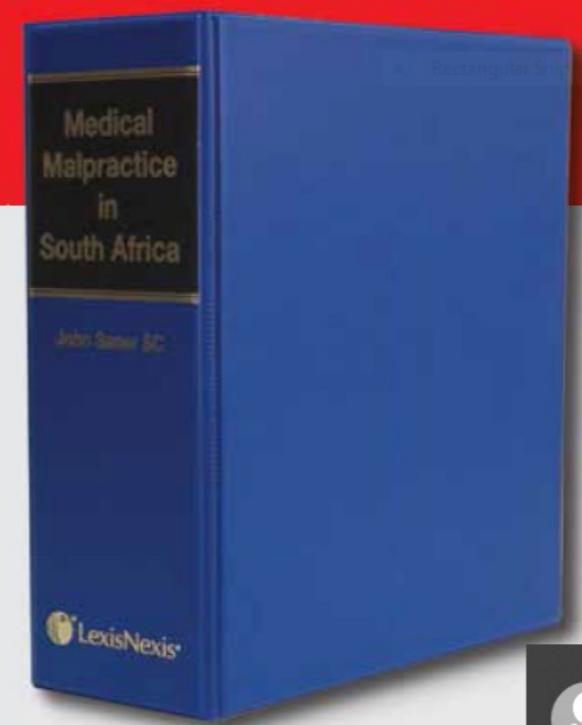

New release

Medical Malpractice in South Africa

by John Saner SC

Medical Malpractice in South Africa deals with the practical aspects of medical negligence litigation from a substantive, procedural and ethical point of view. It provides guidance on the many pitfalls of this complex litigation process which if not avoided, could result in an adverse outcome and substantial costs for the client. Practical and designed with ease of reference in mind, this publication contains useful appendices such as a guide for the analysis of pleadings.

R1150.00 (incl. 15% VAT and excl. delivery)
